Summary

I am a Front-End Web developer passionate about crafting seamless user experiences. I am also exploring the vast potential of blockchain technology to shape the future of the web.

Skills

JavaScript	React	Typescript	Tailwindcss
Node.js	Next.js	Solidity	HTML5/CSS3

Education

Federal University of Agriculture Abeokuta
BSC. HYDROLOGY   2021

Project Portfolio

A PORTFOLIO WEBSITE FROM SCRATCH USING REACT.JS   (View on GitHub)

In this project, I used React to build a Personal Fully Responsive Portfolio Website.

Email.js	Swiper.js
CSS3	

FULLY RESPONSIVE REAL ESTATE WEBSITE (View on GitHub)

I built a responsive Real Estate Website for a brand Exploits Real estate which help them to scale up their real estate business, introduce professionalism to their brand and also caught interest of investors and partners.

React	Tailwind-Css
Framer-Motion	Web3-Forms

A WAVE PORTAL (View on GitHub)

In this project, I developed a wave portal, it a place where anyone on the internet can learn a little about me and send me a 👋 + a message and have that data saved on the block chain through an Ethereum smart contract, I used the following technologies:

Hardhat	Chai
Ethers	Solidity

Work Experience

[TEAM DECENTRALIZED FINANCING](#)
BLOCKCHAIN EDUCATOR   2020 – PRESENT

- Part of the organizers of Team Defi Empowerment Program that seeks to educate attendees on Block chain technology and cryptocurrency.
- Participated in educating students on opportunities in block chain and how to leverage the technology
- Working as the Administrator and delegating tasks to various team members.
- Contributing to Websites Development and writing of smart contracts codes for numerous projects in the organization

[SIDE HUSTLE INTERNSHIP](#)
REACT.JS   August 2022 – September 2022
- I applied and participated in an internship Program organized by Side Hustle to groom my skills on React.js

Certifications

[Simplilearn Blockchain Certification Training](#)
- Learnt the Basics of Block chain technologies, Solidity and Smart contracts. Equipped with Knowledge about Cryptocurrencies and various implementations on the Block chain

[Udemy courses thecomplete 2022 web development boot camp](#)
- Learnt the latest technologies, including JavaScript, React, Node and Web3 development. The course helped me mastered both front and back-end development.

[The complete JAVASCRIPT with HTML5 and CSS3 from zero to expert - 2 0 2 2](#)
- The course gave me a basic understanding of HTML5, CSS3, and JavaScript and then by combining all these skills, I learnt how to build a Modern Looking Responsive Website which looks great on all the Small and Wide Screens
